SPEAKING & PRESS

- **SXSW EDU 2025 · Panelist**
  "Behind the Wheel: Youth Driving Tech & Media"
- **PBS · "Tech For Us"**
  Featured engineer · nationally televised 2025

AI-ASSISTED DEV

Claude Code · Cursor · GitHub Copilot · ChatGPT

CORE STACK

React · React Native · TypeScript · JavaScript · Node · Next.js · REST APIs · PostgreSQL · Prisma · Supabase · Firebase · Python · FastAPI · Tailwind · CI/CD · Vercel · Gemini · OpenAI · Git

EDUCATION

Front-End Engineering & UI/UX
Turing School of Software & Design

B.S., Biology
Cornell College

Senior full-stack engineer specializing in React, TypeScript, and Node. Through An App Idea LLC I've shipped more than five production applications end to end, pairing React and React Native front ends with TypeScript-strict Node and PostgreSQL backends, secured APIs, production AI integration, and CI/CD. Before that I built responsive React interfaces at a generative-AI platform and full-stack features across React and Ruby on Rails at a fintech serving small businesses. I move quickly across the stack, lean on AI development tools throughout my workflow, and sweat the details that keep software reliable for real users.

SELECTED WORK

PINPOINT · Full-Stack Web & Mobile Platform

React front end on a Node and PostgreSQL backend, with JWT-secured REST APIs, SSE streaming, and AI-powered analysis via the Gemini API.

Payback · Privacy-First Behavioral Analytics

On-device insights using AES-256 encryption, anonymized tracking, and GDPR and CCPA data-deletion flows built in React Native and TypeScript.

The Yap App · Real-Time Multilingual Translation

Live cross-language conversation over the Gemini Live API, with resilient auto-reconnect and earbud-aware voice assignment across concurrent audio streams.

EXPERIENCE

Founder & Full-Stack / Mobile Engineer · An App Idea LLC

Jan 2025 – Present · independent software studio

Solo-built and shipped 5+ production React and React Native apps (Expo SDK 51–54) end to end, owning product, architecture, TypeScript-strict Node and PostgreSQL backends, production AI/LLM integration, CI/CD, and App Store and Google Play releases.

Front End Engineer · Hypercard AI

Oct 2023 – Apr 2024 · generative-AI platform

Built responsive React and TypeScript interfaces and a customizable multi-format export system (PPT, PDF, CSV, DOCX, XLSX, JSON).

Software Engineer · Human Interest

May 2021 – Feb 2023 · fintech expanding retirement access for small businesses

Full-stack work across React, Ruby on Rails, and data-ingestion pipelines; integrated 95%+ of partner APIs and built CI/CD automation that cut integration time 30%.

TEACHING & MENTORSHIP

Upright Education (Teaching Assistant) and **Turing School** (Alumni Mentor): taught full-stack JavaScript to cohorts of 15 to 25 and mentored developers through code reviews, pairing, and mock interviews; mentees placed at technology companies.
